MS600 Motion Sensor

The new Salus MS600 Motion Sensor lets you know when movement is detected in a certain area and can trigger different actions in response to that movement (or lack of movement). It supports the pet immunity up to 80 lbs. This sensor integrated Zigbee communication module to connect with the SALUS UGE600 gateway.

Features:

- Up to 3 years of sensor operation on one battery .
- Supports pet immunity up to 80 lbs. OneTouch rules operation (e.g. when motion is detected after sunset, activate lighting for a certain period of time)
- Low battery alarm.
- Easy installation with bracket.
- Equipped with an anti-tamper switch that reports any tampering.
- Can be linked to other Salus Smart Home devices via Smart Home rules engine.

Technical Information

Model Number:	7C-SS-ZA-H0/7C-SS-VA-H0
Detection Angle:	80º
Detection Range:	8 m
Light Sensor:	20 lux, For day/night (bright/dark)
Power Source:	3VDC, CR123A x 1
Battery Life:	3 Years
Pet Immunity:	80lbs
Radio Frequency:	Zigbee 2.4G GHz/Z-Wave 868.42MHz (EU), 908.42MHz (US), 921.42MHz (AU)
Detection Technology:	PIR
Operating Temperature:	0ºC ~ 40ºC, 32ºF ~ 104ºF
Operating Humidity:	Up to 85%, Non-condensing
Mounting Height:	6.23 ft to 7.55 ft. (1.9m to 2.3m)
Operating Range:	30 ft. (40m) LOS
Certifications:	FCC, CE
Mounting:	Bracket by screws or foam tape
Dimensions (mm):	60.45 x 80.52 x 43.18
